## SUMMARY

I am a full-stack web developer who builds real-world web applications to solve practical problems. I work on both frontend and backend and focus on writing clean, simple, and maintainable code. I enjoy understanding user needs and turning them into reliable, working solutions from start to finish.

## WORK EXPERIENCE

### Support Engineer, at [Learn With Sumit](#)

Jan 2025 - Dec 2025

- Served as a Support Instructor for the Reactive Accelerator course, assisting students and resolving technical issues.
- Maintained and updated the course website to ensure smooth performance.
- Reviewed student assignments and provided feedback to improve code quality.

### Co-Founder & MD, at [CodeVionix](#)

Jan 2025 - Present

- Founded Codevionix and led its technical vision and overall product development.
- Served as Senior Engineer, architecting scalable solutions and driving key engineering decisions.
- Guided and mentored team members, conducted code reviews, and managed day-to-day development workflows.

## PROJECTS

### MessMama - Digital Management App - [Link](#)

- Implemented core modules including expense tracking, payments, subscriptions, and authorization guards.
- Defined feature workflows and user flows to ensure a smooth and scalable system design.
- Designed and implemented the core business logic driving the project's functionality.

### Azizul Law Academy - LMS System - [Link](#)

- Implemented multi-language support to ensure accessibility for a diverse user base.
- Developed and integrated the course purchase payment system for secure and seamless transactions.
- Made key architectural decisions to ensure scalability and maintainability of the project.

### TapaScript - Blog Site - [Link](#)

- MDX Support: Write articles in Markdown with embedded JSX for interactive content.
- Code Block Support: Syntax-highlighted code snippets for improved readability.

## EDUCATION

### Mastery of Frontend Engineering

2024

#### [Learn with Sumit](#)

[Course Report](#)

Completed comprehensive training on React, Next.js, and real-world project architecture.
